

neoClassroom

English Solutions for Academic Learning

neoClassroom

Online, blended-language learning for proven results.

Teachers and administrators follow learners' progress through easy-to-follow monitoring and automated graded reports. With a click of a button, teachers can choose from a selection of AI-generated Recommended Class Activities based on all students' recent lessons, points and current levels. Workbooks, individual worksheets, and other unique content are always available in neoClassroom's teacher portal.

Artificial intelligence (AI) is the key to the customized learning path students go through in neoClassroom; it allows them to study at their own pace, earn study points and advance towards their learning goals. The AI engine ensures that students get more of the content they need for mastery and less of what they already know. These study points open up new lessons, Mastery Tests, and Certification Tests. Each level is fully aligned to the Common European Framework of Reference for Languages (CEFR).

You and your learners are at the heart of neoClassroom:

Personalized Learning Paths

Learners are automatically placed in the level that is right for their skills, and they continue to advance at their own pace. neo's AI ensures they are not bored or frustrated as they reach their goals.

Easily Accessible Courses

Because our adaptive study tool, neoStudy, is available on the web and as a mobile app, students can access neo courseware using Google Chrome on Chromebooks or on Windows or Mac computers. In addition, they can log in on their tablets or smartphones. Regardless of when or where they log in, their study data will synchronize across all their devices to our secure cloud servers.

Real-time access to student progress

Teachers and administrators can easily ensure the effectiveness of their program by monitoring students and classes on the nexgen Dashboard. Data is updated in real time, making it easier to assist students with extra support when they need it.

Takes the guesswork out of grading

Grades are earned based on the point goals teachers set in advance on the nexgen Dashboard. Learners earn points if they are dedicating the time and effort required to improve their English fluency.

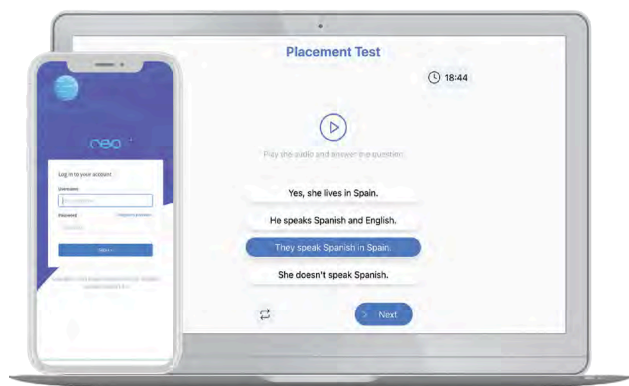

Download our Recommended Class Activities (RCAs) anytime

Access teacher-led activities for each class at the click of a button. RCAs are generated based on the current activities that the students are completing online. They provide additional practice of the concepts, grammar, and vocabulary found in the neo courses for students who may be at different levels in a class.

Getting your students started is easy

Administrators can bulk-upload large groups of students or individual learners and assign them to a teacher and a class. Learners can then be evaluated using neo's Placement Test that assigns them to the English level that is optimal for them. From the start, the system uses integrated-artificial intelligence (AI) to provide adaptive learning with lessons that constantly adjust to their individual needs.

Three age-appropriate courses to choose from

neoJr+ focuses on the basic framework of English. It offers young learners a fun and effective way to learn English. With neoJr+, Emergent Bilinguals develop the language base that is a prerequisite for effective literacy development and the neoPrep+ course.

neoPrep+ is designed for teens and young adults who need to succeed in academic learning environments. It focuses on school subjects and social English skills, and includes a variety of highly interactive listening- and reading-based activities that help learners improve their fluency skills.

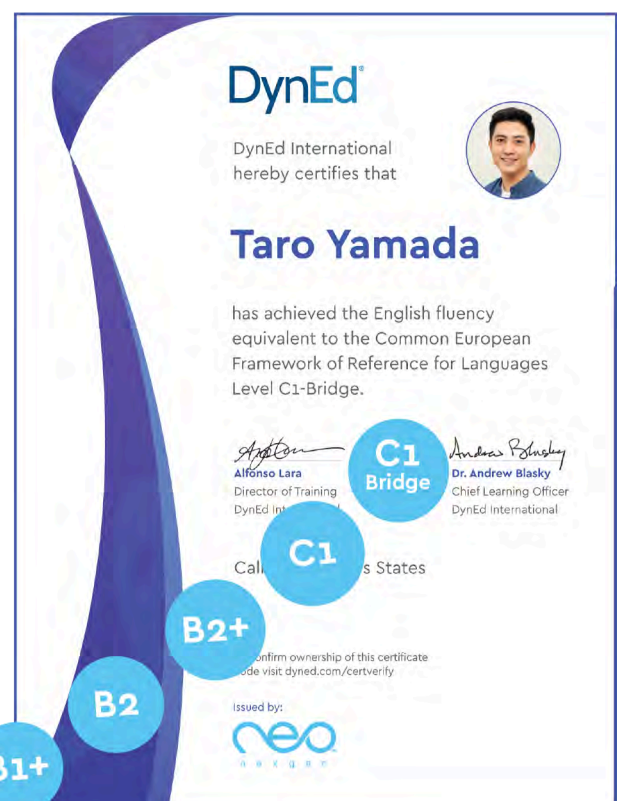

neo+ helps adult learners develop the communication skills necessary to succeed in today's global economy—the perfect English-language solution for professional development and higher-education programs.

Students reach fluency faster than with traditional programs

neo's comprehensive learning system is backed by a deep analysis of learner behavior and progress from 30+ years of success—specifically, data from more than 25 million English learners from around the world. This data indicates that neo learners reach their fluency goals faster than with other programs.

Each of the 11 levels in neoPrep+ and neo+ can be completed in 36 study hours or less. Each of the 3 neoJr+ levels can be completed in about 30 hours. All courses can be blended with personalized teacher-led instruction to ensure results.

Learners advance from one CEFR level to the next by successfully completing all the lessons and tests for each level. When all requirements are met, they earn internationally accepted English-language certificates that are fully correlated to the CEFR and verified by DynEd International.

neo's additional features ensure your English program delivers the results you need, when you need them:

- **Co-branding**
Add your school's logo to the Placement eTest.
- **CEFR-Aligned Certification**
Students can earn one or all CEFR English level certificates.
- **Certification Test Management**
Administrators can lock and unlock CEFR levels' final Certification Tests from the Dashboard to facilitate proctored examinations.
- **Class Management**
Organize students by country, state, city, district, school, class, or teacher.
- **Continuous Monitoring and Testing**
Learners are continuously evaluated via the Placement Test, Mastery Tests, and Certification Tests. In addition, neo's AI engine continuously monitors learner progress and automatically provides review lessons for learners before taking their Certification Test.
- **Meets USA and EU Data Protection Regulations**
neo complies with FERPA, COPPA, and GDPR student data protection laws.
- **Personalized worksheets**
neo offers on-demand, personalized PDF worksheets.
- **API-Support**
Global or large school systems can request secure access to nexgen's extensive API library.
- **Tech-Support**
Teachers and administrations receive tech support 24/7 for nexgen's Dashboard.
